CO2 Systems

The Perren range of CO2 fire fighting systems comprise of range that can either be trolley or skid mounted. Sizes range from 10 kg to 360 kg capacity systems, the larger of which are supplied in banks of cylinders.

Discharge of the system is via special hoses, suitable for use with CO2. On trolleys the hose length is normally 9 metre. For fixed / skid systems, the hose length can be up to 40 metres with the hose being stowed on a special hose reel.

A number of options are available regarding the discharge nozzle. For close fire fighting, a CO2 valve and horn can be supplied. For elevated operations such as aircraft / helicopters a special telescopic lance assembly can be supplied.

Specification

Options / alternatives

Capacity :	10 kg Trolley (left) 20 kg Vehicle system (right)	45 kg / 90 kg / 180 kg / 360 kg
Hose :	Special CO2 semi ridged.	Hose reel
Hose length :	9 metres / 20 metres	Up to 40 metres
Applicator :	1 metre long	3.3 metres – telescopic.
